Code	Error
EI	Database corrupted
E2	Flash corrupted
E3	LON configuration error
E4	One or more task not started
E5	Cold start was forced
E6	Redundant data storage error
E7	Calibration switch was not engaged when performing a firmware upgrade
E8	Database changed, set as default the new values
11	Two wire communication error
20	Pulser connected and product not mapped or pulser disconnected and product is mapped
24	Volume unit type not set
26	Pump not calibrated
27	Two wire ID changed side A
28	B Two wire ID changed side B
29	Valve not open
30	Catastrophic error has occurred on the VaporVac
33	E-stop button activated or VaporVac failure on one side
35	Configuration data error
37	Pin code one changed
38	B Pine code two changed
39	Cash/credit option changed
4	Side exist option changed
42	PPU option changed
44	PPU board pump handle on at power up
4307	Blends not programmed
431	Blender - lo octane product low flow
4312	Blender - hi octane product low flow
4313	Blender - lo octane product no flow
4314	Blender - hi octane product no flow
4315	Blender - hi octane product contaminated by lo octane product
4316	Blender - lo octane product contaminated by hi octane product
4320	Valve configured for, but not responding
	Valve stuck
4322	2 Valve board not responding
5000	Meter 0 calibration changed
500	Meter I calibration changed
	Meter 2 calibration changed
	Meter 3 calibration changed
	Meter 4 calibration changed
5005	Meter 5 calibration changed

- 5006 Meter 6 calibration changed
- 5007 Meter 7 calibration changed
- 5008 Blend ratio changed for product 1
- 5009 Blend ratio changed for product 2
- 5010 Blend ratio changed for product 3
- 5011 Blend ratio changed for product 4
- 5012 Blend ratio changed for product 5
- 5013 Blend ratio changed for product 6
- 5014 Blend ratio changed for product 7
- 5015 Blend ratio changed for product 8
- 5016 Flow control setting changed per product I
- 5017 Flow control setting changed per product 2
- 5018 Flow control setting changed per product 3
- 5019 Flow control setting changed per product 4
- 5020 Flow control setting changed per product 5
- 5021 Flow control setting changed per product 6
- 5022 Flow control setting changed per product 7
- 5023 Flow control setting changed per product 8
- 5024 ATC enabled
- 5025 ATC disabled
- 5026 ATC base value changed
- 5027 Sealable switches have been accessed
- 5028 Measurement unit volume changed to liters
- 5029 Measurement unit volume changed to gallons
- 5030 Measurement unit volume changed to imperial gallons
- 5031 Measurement unit volume changed to Hawaiian gallons
- 5041 Power fail power circuit register a power loss
- 5047 Reverse flow detect
- 5048 No flow detect
- 5049 Unauthorized flow detected
- 5050 Invalid pulser pulser pattern does not fit profiled meter
- 5066 STP I configured for, but not connected
- 5067 STP 2 configured for, but not connected
- 5068 STP 3 configured for, but not connected
- 5069 STP 4 configured for, but not connected
- 5070 Vapor vacuum option set, but VV board not present
- 5071 Vapor vacuum option not set, but VV board is present
- 5072 Vapor vacuum option set connected
- 5074 Vapor vacuum motor not responding
- 5079 Valve not configured for, but is responding
- 5081 Air sensor NOT connected, but option is set

- 5091 ATC node communication failure, ATC option set
- 5092 ATC node present, but not configured for
- 5098 T-meter not connected
- 5099 ATC-number of probes exceed number of meters
- 5100 ATC-number of meters exceeds number of probes
- 5101 No pulse train detected from T-meters. The t-meter is connected
- 5111 Door node communication failure
- 5115 Door node software download flash error
- 5116 Door node software download incomplete
- 5118 PPU board communication failure
- 5119 PPU board present, nut not configured for
- 5120 PPU board pump handle not connected
- 5121 PPU board grade select button not connected
- 5126 Key stuck on manager keypad
- 5131 PPP keypad option set, but not present
- 5132 PPP keypad present, but not configured for
- 5133 Key stuck on PPP keypad
- 5134 Call button option set, but not present
- 5135 Call button present, not configured for
- 5136 Call button stuck
- 5137 E-stop option set, but not present
- 5138 E-stop button present, but not configured for
- 5139 E-stop button stuck
- 5140 Push to start button option set, but not present
- 5141 Push to start button present, but not configured for
- 5142 Push to start button stuck
- 5171 Power fail manager keypad mode exited
- 5174 Totalizer node communication failure
- 5175 Totalizer node detected, but not configured for
- 5183 Totalizer present, but no return pulse detected
- 5198 Measurement unit changed not programmed
- 5199 Measurement unit changed 500 pulses per gallon
- 5235 Database corrupted
- 5236 Database build process started
- 5239 Database unit forced
- 5240 Database wrong read or read failed
- 5241 Database write failed
- 5378 Customer interface door node configuration not received
- 5413 PPU option pump handle not connected correctly
- 5600 Fuel density not programmed
- 5601 ATC temperature out of range

- 5602 ATC node incorrect software version
- 5603 Door node incorrect software version
- 5604 Totalizer node incorrect software version
- 5605 MIP node incorrect software version
- 5606 ATC node subscription failed
- 5607 Door node subscription failed
- 5608 Totalizer node subscription failed
- 5612 TW converter error
- 5613 Pump updated with data from door node storage
